

SECOND CHANCES  
STAR TREK: ANOTHER TWIST OF THE KNIFE

**Notes**

Stardate 46915.2

Planet: Nervalia IV, a research station

Two Rikers

Thomas Riker (the transporter clone) has access to the station's secrets: about 6 different transporter/warp/energy field technologies.

**Mission Agendas**

Picard:

1. Gather as much secret technology from base on Nervalia IV as you possibly can. Get it for your own personal power.
2. Technology can be used to clone large army of Imperial Marines. Get LaForge's help?

Troi:

1. Make sure that none of the technology from the base is used against the Empire.
2. Keep the duplicate Riker alive for "study" by Empire scientists.
