

THE HEIST

SCOT: Ty Wren DANIELLE: Tobi ERIC: Sebastian KRIS: GM

6 September 2180 (Wednesday) - Afternoon & Night

Synthetic Plastic Dreams (SPD) is in an underground light industry "mall"

Mall security is provided by a Lauren-model security bioroid.

That night, in SPD, they meet "Hans," a highly illegal combat bioroid.

Toby grabbed a pad with SPD *important* intellectual property and other data on it, including how to make the feature changing nanomachines (it's "simple": any bioroid's nanomachines can be reprogrammed to alter their bioroid's features as part of a healing routine, maybe there's a "damaging" chemical component that softens the features first).

PCs have pictures of "Hans."

AMBER: PCs sent her back to school...

NEXT TIME: Loony favor that Ty "must" accept.
