

The Game of Construct Cricket

Construct Cricket is a game played by wizards to hone their skills with constructs. The goal of the game is to knock down all three of your opponent's wickets while defending yours. The catch is that the players may not directly affect the wickets. Their constructs must do it for them. No wizard or construct may affect another wizard in any way. A wizard may attack any construct.

Construct Cricket may be played anywhere and by any number of players. Each player has unique wickets and they may place them anywhere in the play area. Wickets are knocked over as soon as they take 1 point of damage.
